

Konica Minolta Dispatcher Paragon

Outstanding Cost Accounting
& Recovery Solution

KONICA MINOLTA

Konica Minolta Dispatcher Paragon has claimed the Buyers Lab (BLI) 2021 Pick Award for Outstanding Cost Accounting & Recovery Solution from Keypoint Intelligence thanks to its...

- Real-time tracking capabilities and rich reporting features that enable businesses to get a clear view of all print, scan, and copy activity
- Access control and secure pull print prevents unauthorized usage and protects sensitive information at the MFP
- Built-in payment system, customizable pricing structures, vendor-agnostic device support, and robust budgeting and quota tools

Despite its cost, many businesses do not have any insight into or control over who is printing, what they're printing, how much any one user or department is printing, or how much money they're spending on print overall. Konica Minolta Dispatcher Paragon solves all those problems, and more. The solution tracks, controls, visualizes, reduces, and recuperates print, scan, copy, and fax costs, enabling businesses to eliminate waste and prevent the IT budget from spiraling out of control.

"Konica Minolta Dispatcher Paragon comes with everything you need to take control of your print environment," said Lee Davis, Keypoint Intelligence's Associate Director of Software/Scanners. "Print rules can be implemented to use lower-cost settings, like duplex and black-and-white only. Administrators can define which functions are available to individual users. Different access roles can be created and assigned so users have access to the features and functions they need to perform their job. Konica Minolta Dispatcher Paragon also provides business with granular pricing and cost recuperation tools. Different prices can be set by user, cost center, device, or project, and administrators can enforce budgets or define quotas to keep print costs in check."

About Keypoint Intelligence

For almost 60 years, clients in the digital imaging industry have relied on Keypoint Intelligence for independent hands-on testing, lab data, and extensive market research to drive their product and sales success. Keypoint Intelligence has been recognized as the industry's most trusted resource for unbiased information, analysis, and awards due to decades of analyst experience. Customers have harnessed this mission-critical knowledge for strategic decision-making, daily sales enablement, and operational excellence—improving business goals and increasing bottom lines. With a central focus on clients, Keypoint Intelligence continues to evolve as the industry changes by expanding offerings and updating methods, while intimately understanding and serving manufacturers', channels', and their customers' transformation in the digital printing and imaging sector.

About Buyers Lab Software Pick Awards

Document Imaging Software Picks stand alone in the industry and are hard-earned awards as they are based on rigorous testing, including evaluation of key attributes such as features, usability, and value. Each product that passes its lab test earns a Platinum, Gold, Silver, or Bronze rating, with the best performers qualifying as Pick contenders.
